Objective

Junior Java Developer

Summary
I am a Junior Java Developer who is seeking an opportunity to add value to the company and develop further my skills in Java programming. I enjoy creative problem solving and am eager to master in new technologies. I'm a quick learner, responsible, hardworking and enthusiastic person able to handle high volume of work with excellent analytic and problem solving skills and a keen attention to detail. Among my strong points are also good communication, negotiation and teamwork skills, flexibility and time management, readiness to overcome any challenges I can meet in my job. I hope that your company will benefit using my skills, great wish to work and excel in developing new technologies.

Skills

- Java SE, Java EE;
- PostgresSQL, H2;
- Hibernate;
- Spring;
- GitHub;
- Intellij IDEA

I have Intermediate level of English. I can translate with a dictionary and also understand what native speakers say. I can read and understand technical texts and discuss technical issues with a team.
